Dear Dr.Geller,

This is to thank you for removing the floaters in my right eye. All that is left are very small remains visible only in very bright light. I had been told by my ophthalmologist in NJ that there was nothing that could be done! I also didn't have much luck with a Google search on the web. Although the floaters were not considered major, after nearly two years they were still a constant annoyance.

Thanks again,
With best regards,

Norman W. Nelson
