I am writing to thank you for your recent laser treatment of my floaters. As you recall I had strands and clumps in both eyes. Those floaters were a real pain. You were able to zap the largest one so it does not bother me any more. I am now able to read and drive at night much better. I am not having the terrible star burst blurriness at night anymore. I would recommend this treatment by you to any candidate without reservation. I am basically very pleased with the results but may consider having some further work on the remaining strands in the future.
