

Subject: Floater Treatment

Date: Monday, June 27, 2005 9:24 AM

From: Thomas <tom@metallurgy.com>

To: 'Scott Geller MD' <scottgellermd@vitreousfloaters.com>

Good morning Dr. Geller,

The results of the laser surgery appear to be permanent; the floater is staying out of the line of vision and therefore giving me the ability to see clearly out of the left eye.

I will be writing the Kaiser Permanente Eye Clinic and will likely be speaking to the department head about your procedure and the results. I intend to allow her to examine my eyes to verify that the floater they saw is no longer in the center of my left vision and has markedly changed shape due to your laser treatment.

I will keep you informed about their response and any decisions that result from discussions and/or examinations.

My thanks to you again for your fine work (take care for the ducks).

Best regards,

Tom Bertone
