

NORTHWEST ACUTE CARE SPECIALISTS, PC

July 20, 2009

Dr. Scott Gellar
South Florida Eye Foundation
29 Barkley Circle
Fort Myers Florida 33907

Dear Dr. Gellar:

I want to thank you for your outstanding care of my left eye. The Yag laser treatment was successful in eliminating the large floater (Weiss ring) that developed as a result of a posterior vitreous detachment. As you remember my floater was not a serious impediment to my vision but rather a constant annoyance. A few leftover floaters post-treatment are small and easily ignored. What I am most grateful for is no longer being preoccupied with this problem as I was during 100% of my waking hours before seeing you. As a physician specializing in Emergency Medicine (providing initial care and specialty referral to a large number of patients with eye emergencies over a 30 year career) and now as a patient I greatly appreciate your rare level of expertise and technical skill. I would not hesitate to refer anyone with this or any other ophthalmologic condition to your care.

Sincerely,

Michael Sidoff MD
