Scott L. Geller, MD
South Florida Eye Clinic
4755 Summerlin Rd., Suite 1
Ft. Myers, FL 33919

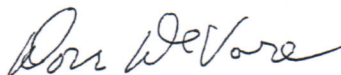

Dr. Geller,

I have been searching for a treatment for 'floaters' for quite a while before learning of your success in treating patients for this condition. I read about your professional practice, educational preparation, and laser treatment for floaters when visiting family in the North Port, Florida area. Prior to this, I was told by medical professionals that there was nothing that could be done to eliminate or reduce the size of a large floater in my right eye.

Before receiving your laser treatment, I had become discouraged with the constant annoyance and vision impairment associated with a floater blocking the vision in my right eye -- and believing it could never be treated. Following your laser treatment on this eye, I now enjoy improved vision and an enhanced quality of life.

Thank you for your concern for persons with compromised vision due to floaters -- and for your years of study and practice to provide excellence in treatment and care for this condition.

Sincerely,

Don DeVore
