Dear Dr. Geller,

It was an absolute delight to be able to work with you regarding my eye floaters. As you can see, I am a musician, and my sight is extremely important to me (as I am sure it is to everyone, but especially to me so I can read my music!)

Our recent visit where you "pulverized" the large floater that was a hindrance, and a great irritant, was quite successful! I am now no longer inhibited with this large mass in my eye, and I can see much better with little problem. I do still have some minor floaters, but compared to what I had when I first came in, these small floaters are NOTHING!

I am very pleased with the work you did, and I recommend your treatment to anyone who has a similar situation. I will be happy to be a reference for your work, should you need that.

I am happily playing my cello (I also play piano) with better vision and clearer views than I have had for some time.

I have not yet reviewed the DVD you supplied which shows the treatments for my eye, but I can tell you I have not had any pain or blurring or issues since the treatments!

For the record, we did 4 treatments to my left eye, and I am quite pleased with the results and treatments you provided.

Bill greatly appreciated being able to observe the entire process as well!

Thank you so much!

Regards,
Janice (& Bill) Winchell
